

Evidence for a defensible investigation.

Scope and evidence

Classification: synthetic_simulation

Agreement: deal-cpa, version 1.0; operator: operator-1

Partners: publisher-01, publisher-02, publisher-03, publisher-04, publisher-05, publisher-06, publisher-07, publisher-08.

GEOs: BR, CA, DE, ES, FI, FR, GB, IE, IT, NL, PT, SE.

Period: 2026-09-01T00:00:00Z to 2026-10-01T00:00:00Z (end exclusive).

Observation watermark: 2026-10-01T00:00:00+00:00

Rule version: integrity-3.0.0

Canonical evidence SHA-256: 7cef2465f3fa7b395a1863f6aa078e0ddfa4288d2f1998ab99b7c52e86873159

Commercial comparison

Model: CPA. Acquisition rate: 180.00 EUR. Revenue share: 0.000000.

683 acquisitions qualified; 0 unknown; 0 unlinked events.

Acquisition component: 122940.00 EUR. Revenue share: 0.00 EUR.

Expected under configured terms: 122940.00 EUR (provisional if coverage incomplete). Observed payout: 122940.00 EUR.

Potential settlement exposure: 0.00 EUR; status: agreed.

Delivery comparison: 147 missing; 0 pending; 536 confirmed.

Delivery exposure: 26460.00 EUR; pending or unlinked observations prevent a complete estimate.

Calculation: $\max(\min(\text{qualified acquisitions} \times \text{rate} + \text{expected revenue share}, \text{configured cap if any}) - \text{observed payout}, 0)$

Delivery and settlement exposure must not be added. No confirmed loss or legal receivability is asserted.

Source completeness

backend: complete 2026-09-01T00:00:00Z through 2026-10-01T00:00:00Z; known at 2026-10-01T00:00:00Z; reference synthetic:r2-synthetic-3.0.0:backend

finance: complete 2026-09-01T00:00:00Z through 2026-10-01T00:00:00Z; known at 2026-10-01T00:00:00Z; reference synthetic:r2-synthetic-3.0.0:finance

partner_platform: complete 2026-09-01T00:00:00Z through 2026-10-01T00:00:00Z; known at 2026-10-01T00:00:00Z; reference synthetic:r2-synthetic-3.0.0:partner_platform

Qualified acquisitions lack partner confirmation

Incident: 41fd102eeeebef43c7fceb0f7298b39e83ab04e9bfb80e13440fb8078ed137cf

147 qualified acquisitions have exact originating event identities.

Callback deadlines have elapsed and declared coverage permits an absence comparison.

backend to partner_platform: Delivery disagreement is established; the responsible endpoint is unresolved. Missing evidence: Sender delivery logs, Receiver ingestion logs, Schema and identifier changes. Alternatives: Sender delivery failure, Receiver rejection, Incorrect completeness declaration.

Limitations and reproducibility

Source completeness is explicitly declared, not inferred from absence

Sample journeys are illustrative; full obligation list is included

No confirmed loss or externally attested root cause

Delivery exposure and settlement exposure must not be added together

This report samples 6 of 683 acquisition obligations. The companion canonical JSON contains the complete obligation list, monetary observations and evidence references.

A content hash identifies the accepted evidence. It is not a source signature or third-party attestation.

Analyst notes and action history are separate, versioned case records. This immutable report does not imply that a later action was executed or verified.
